When a Medical Assistance plan (MA-MCO) denies medically necessary services like Skilled Nursing or Home Health Aide, clients have a legal right to challenge that decision by filing an appeal. *Families are not always aware of these rights, or how to exercise them!* In this webinar, we will cover the following topics:

- Overview of the various types of appeal levels (i.e. Grievance, External Review, and Fair Hearing);
- When and how to file each appeal;
- How to fast-track an appeal in an urgent situation;
- Review of recent changes to the appeal process;
- Legal protections ensuring current services remain in place during an appeal; and
- Referring patients to PHLP for free legal help with appeals
